CAREER OBJECTIVES

Full-Stack Developer with hands-on experience in MERN and MEAN stacks, specializing in building scalable web applications. Proficient in Java with strong problem-solving skills demonstrated through in-depth knowledge of Data Structures and Algorithms. Eager to contribute technical expertise and coding enthusiasm to a dynamic software development team.

SKILLS

- **Programming Languages:** Java (Core, DSA), Python, C
- **Frontend Development:** React.js, Angular, HTML5, CSS3, JavaScript
- **Backend Development:** Node.js, Express.js, PHP, RESTful APIs
- **Databases & DBMS:** MongoDB, MySQL, PostgreSQL, DBMS Concepts
- **DevOps & Tools:** Git, Docker, Kubernetes, Postman
- **Operating Systems:** Windows, Ubuntu, Kali Linux
- **Core Competencies:** Full-Stack Development, Problem Solving, Data Structures & Algorithms, API Integration
- **Other Technologies:** Blockchain Fundamentals, AI & Machine Learning

EDUCATION

B.Tech	Expected in March 2026
Computer Science & Engineering	
Srinivas University, Mukka, Mangaluru, cgpa: 8.74	
Senior Secondary (XII) Science	2022
YTSS PU College Yellapur, 2022 Percentage: 77.5%	
Secondary (X)	2020
YTSS Yellapur, 2020 Percentage: 78.56%	

TRAININGS / CERTIFICATIONS

- **AWS Cloud Foundations**
Amazon Web Services (AWS) – Issued: 31/01/2025
Demonstrated knowledge of core AWS services, cloud concepts, security, and pricing models.
- **IT Specialist – Databases**
Certiport – Issued: 19/08/2024
Gained foundational skills in database design, management, queries, and analysis.
- **Data Science & Analytics Certificate**
HP Foundation – Issued: 31/12/2024
Developed foundational understanding of data science concepts, analytical techniques, and data-driven decision-making.
- **JavaScript Programming**
ETHNOTECH ACADEMIC SOLUTIONS PVT LTD, Mangalore- Issued: 19/08/2023
Completed 40-hour training in JavaScript, covering syntax, DOM manipulation, and web development basics.
- **Time Management**
Infosys Springboard – Issued: 26/12/2022
Acquired practical time management techniques to improve productivity and efficiency.

PROJECTS

Phishing Simulation Tool	May 2025 - Aug 2025
MERN Stack EyeQ Dot Net (Internship)	
Developed a phishing awareness tool using MongoDB, Express.js, React.js, and Node.js. Integrated JWT authentication, cookies, and Tailwind CSS. Built to simulate real-world phishing scenarios for user awareness in a cybersecurity-focused environment.	
Construction Management System	Aug 2024 - Oct 2024
PHP Hackathon Project	
Designed a platform for construction companies to track project status, manage workforce, and monitor profit-loss insights. Enabled real-time updates for completed and pending tasks.	
Voice Assistant	Jan 2025 - Feb 2025
Python Personal Project	
Built a Python-based voice assistant to handle commands, search queries, and automate routine tasks, improving hands-on skills in speech recognition and logic flow.	

EXPERIENCE

- Full-Stack Developer Intern**
EyeQ Dot Net, Mangalore –2025
- Contributing to the development of a **Phishing Simulation Tool** using the **MERN stack** (MongoDB, Express.js, React.js, Node.js).
 - Implemented **JWT-based authentication, cookies, and secure token handling** to simulate real phishing attack scenarios for training purposes.
 - Utilized **Tailwind CSS** for responsive UI design and participated in real-time testing in a cybersecurity-focused environment.
 - Collaborated in an **offline team setting**, working directly with security professionals to align project goals with industry practices.
