CAREER OBJECTIVES

Passionate and detail-oriented software developer with expertise in Java, seeking to leverage my skills in designing, developing, and optimizing software solutions. Eager to contribute to innovative projects, solve complex problems, and dedicated to continuous learning and improving software performance in a collaborative and growth-oriented environment.

EDUCATION

B.TECH	Srinivas University	Computer Science (8.7 cgpa)
PUC	Y.T.S.S PU College	PCMCS (77%)
SSLC	Y.T.S.S	KSEEB(78%)

PROJECTS

Construction Management

Aug 2024 - Oct 2024

Web based

The platform designed to manage and track construction projects. It provides real-time updates on ongoing, pending, and completed constructions, allowing companies to monitor progress and manage their resources effectively. The platform also displays key financial data, including profits, and offers detailed information about workers involved in the projects, helping companies optimize workforce allocation and improve project efficiency.

Audio player

Jan 2024 - Feb 2024

Web based

This audio player allows users to easily manage and play their music library. It provides a list of available songs, which users can organize and access based on their preferences. The platform is designed for smooth usability, offering features like play, pause, skip, and sorting options, enabling users to enjoy a personalized and efficient music experience.

Password and note Management

Aug 2023

Application

This password and note management application allows users to securely store and manage their passwords and offering encryption and decryption to protect sensitive data.

Experience

Full-Stack Developer Intern

EyeQ Dot Net — Offline Internship

May 12, 2025 – August 12, 2025 (3 months)

Contributed as a Full-Stack Developer Intern in a dynamic offline work environment, where I actively participated in the development of major projects. Gained hands-on experience in both frontend and backend technologies, collaborating closely with the development team to design, implement, and optimize web applications. This internship enhanced my skills in building scalable, responsive, and efficient solutions while working within real-world development workflows.

SKILL'S

Core Languages: Java, Python, C, SQL

Web Development: React, PHP, Mongo, Angular

OS - Windows, Kali Linux, Ubuntu

Git, Docker, Kubernetes

Cybersecurity, Blockchain, AI & ML,

Place: Mangalore

Date: 09/01/2025
